

Git and GitHub Assignment

Install GIT & make sure it is added into PATH.

Use GIT as local VCS.

Steps to follow:

1. Create a directory 'project_dir' & cd to 'project_dir'.
2. Initialize git version database. (git init)
3. Create a new file index.html.
4. Check the git status. You should find index.html as untracked file.
5. Stage the index.html file.
6. Commit index.html
7. Make few changes in index.html & create a new file info.txt file.
8. Check git status. You should find index.html & info.txt as untracked files.
9. Configure GIT to ignore all txt files.

10. Again check the git status. You should find only index.html as untracked file.

index.html

comments so far.

Git Branching

Objective: Commit HTML, CSS & JavaScript assignments into GIT.

SECTION-1 (HTML assignments) - Steps to follow:

21. First take a backup of your assignments & projects. This is required because due to incorrect GIT operation you may lose your files.

22. Create an empty directory 'Assignments' & cd to 'Assignments'.

23. Create a file README.txt inside 'Assignments' & write few lines about the contents of 'Assignments' folder.

24. Commit README.txt file.

- branch 'html-assignments'.
25. Now create a new
26. Switch to 'html-assignments' branch.
27. Copy all HTML assignments inside 'Assignments' folder.
28. Commit HTML assignments into 'html-assignments' branch.
29. Make minor changes into few files belonging to 'html-assignments' branch.
30. Commit those changed files.
31. Switch to master branch.
32. Make minor changes into README.txt file & commit those changes into master.
33. Again switch to 'html-assignments' branch.
34. Make minor changes into few files belonging to 'html-assignments' branch.
35. Commit those changes.
36. Switch to master.

37. Merge 'html-assignments' branch into master. Confirm all html assignments are shown in master.

38. Finally delete the 'html-assignments' branch.

```
mujah@DESKTOP-A71F3FR MINGW64 ~
$ mkdir Assignments

mujah@DESKTOP-A71F3FR MINGW64 ~
$ cd Assignments

mujah@DESKTOP-A71F3FR MINGW64 ~/Assignments
$ git init

mujah@DESKTOP-A71F3FR MINGW64 ~/Assignments (master)
$ git branch js-assignments
```

SECTION-3 - (JavaScript

assignments) Steps to follow:

1. Create a new branch 'js-assignments'.
2. Switch to 'js-assignments' branch.
3. Copy all JavaScript assignments inside 'Assignments' folder.
4. Commit JavaScript assignments into 'js-assignments' branch.

5. Make minor changes into README.txt file on line 1 belonging to 'js-assignments' branch.

6. Commit those changed files.

7. Switch to master branch.

8. Make minor changes into README.txt file on line 1 & commit those changes into master.

9. Again switch to 'js-assignments' branch.

10. Make minor changes into few files belonging to 'js-assignments' branch.

11. Commit those changes.

12. Switch to master.

13. Merge 'js-assignments' branch into master. Confirm all JavaScript assignments are shown in master.

14. Finally delete the 'js-assignments' branch.

```
